Central Mountain Counties 8-Hour Ozone Project Level Conformity Analysis for the Angels Camp Bypass

Revisions have been made to the following tables:

1. Action/baseline emission test results table found in Chapter 3, Page 13 (**[Original Action/Baseline Emissions Test Results](#)**) summarizing NO_x and ROG total emissions for Amador/Calaveras incorrectly identified total NO_x for 2008 as 4.53 tons/day. The correct table, as shown on the revision (**[Revised Action/Baseline Emissions Test Results Table](#)**) is 6.01 tons/day. The revision also replaces the reported emission total under the 2008 Action Scenario with 'N/A' to reflect the absence of a 2008 action test for NO_x and ROG.

See Attachment: (**[Original Action/Baseline Emissions Test Results](#)**)
See Attachment: (**[Revised Action/Baseline Emissions Test Results Table](#)**)

2. Appendix C (**[Original Appendix C](#)**) reporting Emission Test Results on Pages did not originally publish summary tables matching detailed output tables. The revised Appendix C (**[Revised Appendix C](#)**) provides corrected detailed tables matching summary output tables.

See Attachment: (**[Original Appendix C](#)**)
See Attachment: (**[Revised Appendix C](#)**)

For an electronic or hard copy of the revised tables, please contact:
